

GoodGraces

Corporate Prospectus & Product Purpose Guide

A unified software ecosystem consolidating church communication, group workflows, internal announcements, and financial infrastructure under a predictable software-as-a-service blueprint.

The Mission to Unify Ministries

GoodGraces was founded to eliminate operational friction within faith-based organizations. Today, local churches face a fragmented tech stack, forcing staff and attendees to interact across disconnected systems for vital tasks.

Administrators route mass text alerts through one system, collect tithes over third-party web forms, host coordinate small-group discussions inside general social networks, and keep track of events in scattered spreadsheets. This separation limits structural overview, introduces security liabilities, and fragments member attention.

GoodGraces remedies this problem by serving as the complete operational hub. We unify community collaboration, fund development, internal chat groups, and official push updates into a single cohesive system. This strategic balance respects congregational accessibility on mobile apps while delivering complete administrative visibility on the backend.

Our Structural Promise:

To replace multi-vendor software overhead with a clean, high-contrast, zero-noise interface. GoodGraces increases administration speed, drops technology costs, and secures internal community dialogue.

Table of Contents

12. Corporate Distribution Targets & Back Cover	12

Connecting the Congregation

The app's entry sequence is engineered to remove technology barriers across all age groups, bringing users directly to their local community space.

Frictionless Discovery

Automatically matches the user to their local home parish or community group using geographical distance arrays, avoiding confusing manual lookups.

Zero-Password Safety

Protects community privacy without relying on complicated passwords. Uses fast, secure email authentication loops to verify membership.

Immediate Group Alignment

Allows users to cleanly filter which operational channels they receive immediate push alerts for right from day one.

The High-Contrast Home Space

APPLICATION SCREEN 02

PRIMARY MEMBER VIEW

Mobile Portrait Environment
High-contrast daily dashboard layout
Insert interface image file

The core app space is styled with clear visual priority to welcome members and highlight daily metrics with zero layout clutter.

Contextual Banners

Greets members dynamically based on local terminal hours (e.g., "Good evening, Abigail."), establishing an immediate, welcoming tone.

Parish Network Indicator

Clearly displays the current active membership hub (e.g., "Cedar Hill Community Church") with options to swap networks easily.

Activity Level Trackers

Gives members quick reference numbers for shared prayers, interactive groups, and upcoming calendar events to encourage participation.

Daily Commitments & Prayer

Encourages intentional everyday interaction by presenting specific scripture and direct avenues for shared support.

Scriptural Invitations

Highlights a singular card-based scripture focus (e.g., "Bear one another's burdens" — Galatians 6:2) in a clean format to maximize reading focus.

Active Prayer Actions

Anchors a high-contrast black button container ("Share a prayer" +) immediately under the daily scripture text for quick response.

Collaborative Support Submissions

Tapping the control prompts a text field that sends prayer requests straight to leadership teams or selected community boards.

Authoritative News Delivery

APPLICATION SCREEN 04

ANNOUNCEMENTS STREAM

Mobile Portrait Environment
Clean announcements listing UI
Insert interface image file

Organizes announcements into a simple, reliable chronological stream, ensuring important community news is never buried.

Verified Channel Stream

Presents official messages, calendar edits, volunteer opportunities, and emergency notifications in a clean list view.

Action-Linked Banners

Enables members to tap posts to instantly map event locations, complete event signups, or view attached reports.

Direct Delivery Precision

Connects directly with admin panel selections to ensure critical updates hit the user's phone lockscreen immediately.

Closed Church Sub-Groups

Provides organized, private communication lines for internal church groups, removing the need for chaotic external chat threads.

Ministry Directory Search

Enables members to find and request access to specific service tracks (e.g., Youth Leaders, Food Bank Teams, Bible Studies) instantly.

Moderated Chat Environments

Hosts secure text strings with simple moderation controls to keep internal group planning and discussions constructive.

Targeted Team Schedule Feeds

Keeps members aligned by listing serving rosters and training times within each specific group folder.

Fundraising & Tithe Systems

APPLICATION SCREEN 06

FUNDRAISING INTERFACE

Mobile Portrait Environment
Tithe input & campaign milestones
Insert interface image file

Replaces clunky web payment forms with a secure, built-in donation experience that simplifies church financial development.

Targeted Giving Tracks

Allows donors to split gifts between regular tithing budgets and specific active community expansion or outreach initiatives.

One-Click Payment Safety

Remembers billing setups via secure tokens, letting users handle scheduled gifts or unique responses in seconds.

Community Growth Bars

Tracks active fund progress visually to keep the church updated on goals, building encouragement without showing private gift details.

Persistent System Navigation

Anchors an identical navigation matrix at the screen base across the app, ensuring users always have immediate path alternatives.

Lower Target Row

Keeps core destinations easily within thumb reach on any phone dimension, simplifying app navigation for all users.

The 5 Core Channels

Maintains consistent options across the navigation row: **Home**, **Community**, **Prayer**, **News**, and **More**.

Visual Position Feedback

Highlights active locations with solid high-contrast indicator shapes around chosen tabs to show current section placement instantly.

Church Subscription Models

GoodGraces sustains ongoing platform growth through a predictable Software-as-a-Service (SaaS) model paid directly by the church organization. The mobile application remains completely free for members and individual regular attendees.

TIER MODEL	TARGET VOLUME	ECOSYSTEM INCLUSIONS & ADMIN ACCESS
Essential Tier	< 250 Active Members	Standard Tablet Admin Console, broadcast channels, verified location lookup, and standard card donations support.
Growth Tier	250 – 1,000 Members	Advanced Admin Console, sub-group messaging controls, scheduled announcement logic, and multi-fund fundraising tracking.
Sanctuary Premium	1,000+ Members	Full console scaling, multiple admin accounts, custom integrations, analytics reporting, and priority server routing.

Our Core Revenue Foundation

By securing revenue from recurring backend software fees rather than charging members, GoodGraces protects the community space from invasive third-party banner ads. This aligns our company growth directly with providing software value to church management teams.
